Marcus Vance

Senior DevOps & Cloud Infrastructure Engineer

Berlin, Germany | +49 152 4892 1092 | marcus.vance.devops@gmail.com | linkedin.com/in/marcus-vance | github.com/marcusvance

Professional Summary

Senior Cloud Infrastructure and DevOps Engineer with over 6 years of experience architecting resilient multi-cloud platforms and automated CI/CD pipelines. Specialized in Kubernetes cluster orchestration, Infrastructure as Code with Terraform, and real-time observability using Prometheus and Grafana. Proven record of zero-downtime microservice migrations and AWS cost optimization.

Education

Technical University of Munich — Bachelor of Science in Information Systems (Oct 2015 – Jul 2019)

- Core Focus: Distributed Systems, Computer Networks, Operating Systems, Linux Administration.

Work Experience

Senior Cloud Infrastructure Engineer at Kvantum Cloud Solutions (Aug 2022 – Present)

- Designed and deployed enterprise AWS infrastructure across 3 regions using Terraform and Ansible.
- Managed production Kubernetes (EKS) clusters hosting 80+ microservices with Helm charts and Argo CD.
- Architected automated CI/CD pipelines using GitHub Actions, reducing release cycle time by 65%.
- Implemented end-to-end observability stack with Prometheus, Grafana, and Datadog, decreasing MTTR by 40%.

DevOps Engineer at Stratus Systems GmbH (Sep 2019 – Jul 2022)

- Maintained high-availability Linux production servers and configured Nginx reverse proxies with SSL termination.
- Optimized PostgreSQL and Redis persistence tiers, establishing automated snapshot backups and failover replication.
- Authored Bash and Python automation scripts for routine system administration and security auditing.

Featured Projects

CloudScale GitOps | *Automated Multi-Cluster Kubernetes Deployment Platform*

- Built automated GitOps deployment workflows using Argo CD, Helm, and GitHub Actions across staging and production.
- Configured secure secret management utilizing HashiCorp Vault integrated with AWS IAM and Kubernetes secrets.
- Implemented network policies and Traefik ingress controllers to achieve zero-trust container networking.

InfraGuard | *Infrastructure as Code Security and Drift Detection Engine*

- Developed automated Terraform static security scanner enforcing CIS AWS foundation benchmarks.
- Implemented Prometheus custom metric exporters in Python to monitor cloud resource consumption and budget thresholds.

Technical Skills

Cloud & Infrastructure: AWS, Cloud Architecture, Terraform, Infrastructure as Code, Networking

Containerization & Orchestration: Docker, Kubernetes, Helm, Microservices

CI/CD & Automation: CI/CD, GitHub Actions, Ansible, Bash, Python

Monitoring & Observability: Prometheus, Grafana, Linux

Data Stores & Web Servers: PostgreSQL, Redis, Nginx, Git
